## PROFESSIONAL SUMMARY

Frontend Developer with specialized experience in the EdTech domain, building and scaling School ERP Systems. Expert in creating high-performance, web applications using React.js, JavaScript, and Tailwind CSS, currently expanding into full-stack development and AI automation, with hands-on experience building AI-powered applications and automated workflows.

## TECHNICAL SKILLS

**Frontend:** *React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS*
**Backend:** *Node.js, Express.js, REST APIs*
**Database:** *MongoDB, Supabase*
**AI & Automation:** *n8n, AI Agents, LLMs, RAG, Generative AI*
**AI Tools:** *Gemini, Claude, Antigravity, Pinecone, Vector Embeddings*
**Tools:** *Git, GitHub, CI/CD, Postman, Vite, VS Code, Vercel,* Jira, Agile

## EXPERIENCE

### Frontend Developer — Jan 2026 – Present

*Yahweh Software Solutions — School ERP System* — Bengaluru, India

- *Developed and optimized responsive web interfaces using React and Tailwind CSS, improving page load speed by 25% and enhancing mobile usability across diverse screen sizes, contributing to a scalable web application.*
- *Worked on multi-modules School ERP System improving UI and functionality issues.*
- *Contributed to the development of a multi-module School ERP system, collaborating with teams to improve UI and resolve functional issues, ensuring seamless performance and user experience.*
- *Performed UAT testing, identifying and fixing bugs to enhance system reliability.*
- *Integrated Supa base for real-time data fetching in the Student Admission module.*
- Maintained full **mobile responsiveness** across all student-, staff-, and admin-facing pages using Tailwind CSS responsive strategies.
- *Refactored dropdown components using modern UI libraries to improve UX.*

### AI Automation Intern — *Aug 2025 – Dec 2025*

*Alma Harvest* — *Remote, Dubai*

- *Developed and implemented AI automation workflows using n8n to streamline business processes.*
- *Built RAG-based customer support workflows that enabled AI Agents to retrieve relevant information from company knowledge bases and provide accurate, context-aware responses to customer queries.*
- *Developed an automated website downtime monitoring workflow to continuously monitor website availability and detect service outages.*

### Software Engineering Intern — Jun 2023 – Jan 2024

*Valutico* — Remote, Austria

- *Gained foundational knowledge and hands-on experience in both frontend and backend development, contributing to web application components and API integration within an Agile environment.*
- Contributed to the development of responsive and user-friendly web interfaces.
- Focused on building foundational knowledge and hands-on experience in frontend and backend software development

## PROJECTS

*School ERP — Frontend Modules React · TypeScript · Tailwind CSS · Supa base · Vite · shadcn-ui*

- *Enterprise-grade School ERP covering the full admissions lifecycle, library management for both dashboard Admin and Student.*
- *Implemented complex UI patterns including multi-step validated forms, Library management systems UI for both student and Admin dashboard,*
- *Stack: React.js, TypeScript, Vite, Tailwind CSS, Radix UI, shadcn-ui, Supabase*

*Asistencia Website— Frontend Modules - Next.js Tailwind CSS ·*

- *Showcased a clean and professional design optimized for seamless user experience across devices.*
- *Built using JavaScript, Next.js, and Tailwind CSS.*
- *Live link: https://asistensia.com/*

*Humnashin AI Assistant — RAG-Based AI Chatbot* - React.js, n8n, Gemini, AI Agent, Pinecone, RAG, Vector Embeddings.

- *Engineered an AI-powered personal assistant using React.js and n8n, integrating custom APIs to retrieve and process information from a dedicated knowledge base, demonstrating full-stack capability in AI-driven applications.*
- *Implemented a RAG pipeline with Pinecone and vector embeddings, enabling the AI Agent to retrieve relevant information and generate context-aware responses using Gemini.*
- *Integrated n8n Chat Webhooks and conversational memory to connect the React frontend with the AI automation workflow.*

## Education

*B.tech in Computer Science Engineering - CGPA: 8.5*
*Amity University, Jharkhand*
